The general condition for star matching is to count from the Girl's star; however in some parts of India, they do count from the boy's star for a match. It would look odd, if counted from a Grill's star the horoscope and nakshatra might match fine, but if same is done from the boy's star, it might give a contradicting verdict! Though the best suitable and suggested stars are mentioned, in one or two cases, it is likely that you will find the Rasi as 6th or 8th houses from boy's or' girl's star (Sashta-Ashtakam known as Sashtashtakam). There is always an exception for some constellations viz. Makam, Mrigaseersham, Thiruvathirai, Swathi & Poorattathi which are considered for match even if Sashtashtaka Dosham is present.

The general opinion , whether it is Rasi Sashtashtakam or Lagna Sashtashtakam, it is best to avoid these matches. Though, there won't be any critical problem with this Rasi Sashtakam, if matched, the couple will disagree in every single matter and lead a life with quarrel (& fight!) daily, thus losing mental peace and happiness. It is said, the 6th & 8th Houses denote enmity & longevity in general, the brain wave clash occurs more frequently.

However, in a few exceptional cases, we see, the couples are more co-operative, understanding and fond of each other, despite the presence of sixth & 8th house match; in these cases, though the Rasi stands to be opposing, the nakshatra lords are friendly or equal! Only in this context, it is suggested to avoid. We see a need to mention, as few ask for clarification, when a star is in the 8th house of the moon sign from the boy or girl, how this can be matched! Also, to avoid confusion, we have not listed the second best suited stars, which too confuses them when it comes to star match. Even if Dina porutham is not there, you can certainly consider other aspects if it is of not Same Rajju. (in a very few exceptional cases, it is stated that the Pada Rajju is not of much harmful and can be considered.)

**Note:** For Aswini, Makam, Thiruvathirai, Mrigaseersham, Swathi & Uthirattathi stars Same Rajju is acceptable. These are the only Starts that gets an Exception for Rajju match. If it is the same star for boy and girl then it is considered for alliance, but in general inter-alia within the above six other stars, then not considered in general. Star matching can be considered if most of the other aspects are scoring on the higher side.

Also, the following eight stars, if that are of same for a boy or girl should never be considered for alliance: Bharani, Ayilyam, Swathi, Kettai, Moolam, Avittam, sathayam & Poorattathi.

#### Kalathra Dosham Horoscopes - a brief definitions.

Kalathra Dosham or the malefic effects of the 7<sup>th</sup> house from a boy or girl's horoscope is discussed here. Please consult your astrologer before deciding the factors as there are numerous exceptions and pariharams are given in the subject.

The placement of Sukran (Venus), who is known as 'kalathrakarakan' (planet influencing spouse or life partner), should be checked. If it is in 7th house, the horoscope has dosham. It can be matched with only boys having Sukran (Venus) in 7th house.

If Rahu or Ketu is in 7th or 8th house from Lagnam (Ascendant) or Chandran (Raasi known as moon sign), there is Rahu/Ketu dosham. For a match, there should be Rahu/Ketu dosham in both girl's and boy's horoscope or both horoscopes should be free from Rahu/Ketu dosham

#### If in a Girl's horoscope:

Mangalya Dosham (Death of Husband or Wife) - Planetary alignment and positions that causes early widowhood for girls are stated as under:

Strong malefic planet in the 8th house in a female horoscope is stated to cause

**early widow hood. If this malefic who is in the 8th house in female horoscopes is owner of the 7th house, and then widowhood should not be predicted.**

When there is a malefic in the 8th house and if the 2nd or 4th house is occupied by strong benefic like Jupiter the wife will predecease the husband, since 8th house aspect by Jupiter even if there are malefic in the 7th house; and if the 8th house in the horoscope of the girl if there is a strong and powerful benefic in her 9th house she will have both good marital life and prosperous children.

**If 6<sup>th</sup> & 8<sup>th</sup> house lords are in conjunction and occupy the 7th house in a female horoscope if moon with no digit strength occupies 7th house as lord of the 6th which will happen only if lagna is Kumbha, if mars and Jupiter occupy 7th or if Saturn is alone in the 7th or if Saturn is alone in the 7th house aspect by 8th lord she will become a widow.**

If Saturn is in the 8th house aspect by strong malefic in a female horoscope she may not get married. There are some exceptions if other favorable factors in the horoscope are indicated.

If in a male horoscope weak moon is in the 5th house from lagna and if lagna, seventh and twelfth houses are occupied by other malefic he will neither have wife nor children.

**If in a male horoscope:**

Saturn in Pisces (Meenam) as 7<sup>th</sup> house, and if the Star Sun is in the Lagna he will lose his wife and this can happen **only** if lagna is in Virgo or Kanni.

Jupiter is in the 7th in Virgo or Kanni and there are malefic in the 4th house from lagna, the wife will meet with an early death.

Sun and Venus are conjoined in the 5th, 7th, and 9th house from Lagna; the wife will have deformity of limbs.

Sun and Rahu or Ketu are in the 7th House he will loose all his wealth either through the bad character of his wife or sickly wife.

If moon and Saturn are in the 7th he will not have progeny. It is also likely that he may not get married.

If lord of the 8th is in the seventh, he will lose his wife very early.

If Mars and Saturn are in the seventh in Cancer, he will get a good and beautiful wife. This can happen only if the lagna is Makara or Capricorn.

The lord of the seventh house when placed in the sixth, eighth or twelfth from lagna or ascendant but not in his swakshetram (own sign) or exaltation sign ucha will afflict his wife's health.

**If Venus known as Sukran, The Goddess of Love, is joined with a malefic planet the persons wife will undergo serious afflictions even to the extent of affecting her longevity the result will be the same if Venus or Sukran occupies her debilitation sign neecha Rasi or an enemy sign or asthagatha combust.**

**If Saturn occupies eighth or tenth house in a male horoscope it will afflict his wife's longevity.**

**If in a male horoscope Rahu occupies the seventh house from the lagna or ascendant or Venus or the moons sign it is said to cause his wife's death in earlier stage.**

The above are a brief compilation of most vital questions that arises while comparing horoscope for marriage match. Please do not just come to conclusion that these are the only things that one need to check or accept. There are many more explanations and exceptions that speaks volume of other matters. Hence it is always suggested to consult an experienced astrologer for other combinations for a suitable star match for vivaha - marriage match.

**STAR MATCHING - THE TEN MOST IMPORTANT & VITAL POINTS TO MERIT IN HOROSCOPE MATCHING - IN Srivaishnava IYENGAR MARRIAGES, and in the Hindu community in General known Vivaha Dasa Porutham according to Vedic Astrology. (Star Matching & Compatibility according to Constellations).**

**STAR MATCH** (Constellation)/ **Dina Porutham or Nakshatra Porutham**: It is the compatibility of the birth star of the bride & groom. This means the matching and coping tendency of the male & female together for life time. It also indicates one's fortune and prosperity factor.

**GANAM**: Three classified characters of individuals are listed being *Deva* (Divine), *Manusha* (Human) and *Rakshasa* (Demon). This denotes the compatibility of Man & Woman to have even level of Ganam that goes together. This shows the temperamental level of both gender.

**MAHENDRAM**: This indicates progeny and happiness together.

**STHREE DHIRGAM**: If this matches then the female counter part's well being will be of fine after marriage and for life time, i.e. longevity of relationship.

**YONI**: Compatibility of private organs of man and woman. The classified stars should not be of enemy's one. These yonis are symbolized that are of some animals grouping, such as Tiger, Cow, Rat, Elephant etc. This match is giving the desired level of satisfaction, sexual urge of nature, for the matched couples in their sexual life and physical satisfaction for both at par.

**RASI**: (Moon sign) - This is an indication of overall compatibility of the couples.

**RASI ATHIPATHI**: (Lord of the Moon sign): This denotes the finest relationship among groom & bride's parents & their family.

**RAJU**: This is the most vital match that is the essence of all other matches. If this mismatches, even if all other 9 matches are found, then it should totally be rejected. It is an indication; the mismatched Rajju is most fatal to any one of the couples. Must be avoided if mismatch found in this particular aspect. This is the most important to any caste among Hindus, as it might be fatal to any one of the couple. It is an indicator of strength and weakness in married life.

**NAADI**: This is called of pulses of the stars match and classified into three groups viz. *parsuva*, *Madhya* & *Samana naadi*. This match is found then the woman counterpart will live long with her husband. This also physiological constitution and compatibility.

**VASIVAM**: The magnetic control or amenability of the couple and the mutual attraction to each other is denoted if this match found.

**Vedhai** - Any possible challenges, doshas and afflictions, if any.

The above Hindu system horoscope match is based on the Moon Sign and constellations (Nakshatra). If six out of ten including the vital Rajju is matching, then it is recommended for alliance. The match above 51% but below 60% it is moderate. Between 60% 70% then it is Good. Between 71% and 80% Very good and above 80% The Best.

Apart from the above matching, from the boys or girls Moon sign should not be of sixth and eighth houses. It is called *Sashta-ashtakam*. Also there should be **no Dasa Sandhi**, i.e. both the partner should not have same Dasa running concurrently.

The next most vital things is of *Mangal Dosham*, *Kuja Dosham* or the so called *Chevvai Dosham*. There are numerous exceptions for all the above as per the Hindu Vedic Astrological teachings. You may read my article on this subject in the other page titled NAVAGRAHA PREETHI under Caption 'Mars' in this same site. It is all about the placement of Mars in a natives Horoscope.

Despite all the matches, if a marriage fails & no compatibility found then one will come to the conclusion that these are all farce. What then the real meaning of search so many horoscopes and finding the matches? Is it not a sheer waste of time and energy in doing so?

No. In fact the horoscope of either of them must be wrong or the birth time given wrongly, or the Ayanamsa, Longitude & Latitude given wrongly. If any of these are wrongly computed, then the entire horoscope becomes invalid. Above all, fate supercedes everything! Just the saying goes "marriages are made in heaven".

## **Navagraha i.e. The Major 9 Planets**

What does it signify? Do these planets have any influence on the earth? How can one define these influences ?

During the Vedic Era, the Sages and the Saints known as Rishis and Munis used to calculate the time from the sunrise till sunset by viewing the shadows. During night time they used the stars positions to judge the time of the moment. Unlike these days they never had any clock and measuring instruments, yet they were far more accurate in finding the planetary positions and their movements. What they found is astonishingly accurate to today's developed science and technology.

They identified the planets and its influence on the earth and its particles so precisely that each planet has some relative element in its existence. Listed below are some of the links and examples that are quite relevant to Astrology and its notions.

Sun being the largest star in our Solar system, while passing its rays to the earth, also touches many other planets before entering into the earth's atmosphere. Thus radiation emanated from the Sun is a mixture of rays with contamination from other planets. These mixed rays are suitable for some and not so for others, whether human or otherwise.

To overcome these problems they found simple solutions from nature itself and discovered that each planet is, in one or other way linked to the nature, viz. tree, plants, grain, mineral and color too. They precisely found the links and identified it with remarkable influences.

For instance, wheat is identified with Sun and if a person has the Star Sun placed in a weaker position, then he is advised to substitute wheat with other food items. This is a corrective measure which helped the sufferer from the ill effects of the planet/star.

Like wise, for each planet they marked a particular grain, mineral, metal, tree or plant, color and flower. Within my limited knowledge, I give below the list of each planet and its relative substance on the earth. One can then easily understand why an astrologer suggests some gem or other to weed off the ill effects of a specific planet. I am giving hereunder the sample stones also for one to recognize.

Alright. Now what about its effects and influences on humans? How can one be sure which color or stone suites someone best? What effect these gems will have on a person?

Let us study these points one by one. First, let us discuss the planet Saturn. People in general tend to fear saying this planet's name and are scared once they find that they are under the influence of Saturn (Saade Sathi or the so called Seven and half years period of Saturn's cycle).

Planet	Color	Gem	Grain	Metal
Sun	Red	Ruby	Wheat	Bronze
Moon	White	Pearl	Paddy/Rice	Lead
Mars	Red	Coral	Bengal Gram - Red Lentil Gram	Copper
Mercury	Green	Emerald	Green Gram	Mercury
Jupiter	Yellow	Yellow Sapphire	Indian Yellow Split Peas (split Gram Lentil) Chana Dal	Gold
Venus	White	Diamond	Soya Gram	Silver
Saturn	Blue	Blue Sapphire	Sesame (Gingili)	Iron & Steel
Rahu	Black	Zircon	Black Gram	Rocks- Blackstone
Ketu	Multi-color	Cat's Eye	Horse gram	Red stones

As listed above, Saturn is identified with Iron & Steel and its rays contain Iron particles. When Iron substance is excessively found in one's body then the neuron chips in the brain gets disturbed. Thus the emitting of brain wave is also disturbed or scattered and this puts a person under

Saturn's effects to great hardship. People tend to ignore this person. Many a time clashes occur. A person under its influence is likely to slip from his or her routine. They are more often attracted towards unwanted and unlawful activities. Greed takes them for a ride and they may even tend to go for gambling, howsoever a refined person he or she may be.

Saturn is a very slow moving planet and it takes roughly two and half years to cross one sign of 30 degrees. Unless it is a new moon or full moon day, generally during all Saturdays, the atmospheric pressure is very minimal. This low pressure in atmosphere causes lethargic attitude in most of us and for those who suffer from the Seven and Half years (Sade Sathi) period of Saturn, in particular. That's why persons affected by it become lazy and lethargic during the ill effect period.

This I have seen in many peoples' horoscopes that practically during the Saturn's ill effect periods known as Sade Sathi, they tend to forget even most important assignment, lose valuable items, become very lethargic and inactive, lose weight, and spend money more than usual and mostly borrow it even if it is for higher interest rates etc. thus taking him to a bad debt trap.

Many a person who suffered these bad effects were given some remedial suggestions according to astrological considerations. If a person wears a blue sapphire stone during that specific period, the Saturn's ill effects are minimal. But how a stone or gem can bring solace is questioned by many. The fact is that the mineral content in a particular stone and the cosmic radiation combined together are beneficial, that much one can be sure of. And there is always a link between our Mother Earth and the Celestial movement of planets; even the researchers inform, that some sort of sound emission from other planets too reaches the Earth; this sound vibration too causes some disturbances with any person affected during the 7and half year (Saade Sathi) period.

Some alternative methods are also suggested to weed off Saturn's radiations. One such suggestion is to light/burn the gingili (sesame) seeds soaked into gingili (sesame) oil and inhale the carbon. This method is practically done on every Saturday evenings in the famous South Indian temples which hold a separate location for the Temple of Planets. This method supposedly relieves one from Saturn's ill effects, viz. by inhaling the gingili Carbon, the ventricles take it directly to the brain and the chemical reaction caused in the brain releases the excessive Saturn Radiations from the brain, through the seven visible holes in the face itself - i.e. nostrils, ear, eyes and mouth. In addition, the skull punch or the focal point, (from where brain waves are emitted) also ventilates the Saturn's radiations. Saturn's rays are, presumably, thick containing more iron substance/iodine.

Another such method is, just to keep the gingili seeds into one's palm for few minutes and then to gift it to a Brahman. It is said, that gingili seeds absorbs the Saturn's rays directly from the body and gives relief to the sufferer. This is also done on a Saturday. It is widely believed that the receiver of this gingili gets the ill effects of the Planet Saturn and the receiver is mostly a Brahman

who should take remedial measures to correct the imbalances. This I shall discuss in a separate article under Duties of a Brahmin.

**Stones! But all precious!!**

**These are remedial values too.**

## **R A H U**

Next to Saturn, the people in India are generally scared of the Shadow planet called Rahu which is known as "Dragon's Head" or Ascendant Node. Though this is called a shadow planet and it takes anti clock wise move, its influence in one's horoscope is very high. Very particularly during its Dasa period of 18 years. Rahu represents many ill aspects in general. Rahu is identified with Black Cobra, poison, Zircon, black magic, gambling, black gram, black stone, blade grass (Dhruva in Hindi) menial jobs, slavery, all sorts of skin ailments, venereal deceases, impotency, childlessness, jail/imprisonments etc etc. In short this planet mostly gives only negative results when it is ill placed in one's horoscope.

If Rahu is placed in the fifth house from Lagna or Ascendant, then the native is most likely (he/she) childless and in some cases only female issues and surely no male child. If there is any conjunction with other planet, this result may, however, vary.

Likewise, if this planet is placed in the 6th house, the native is likely to suffer from skin ailments, skin burns, dryness, sore skin etc. That too when the Rahu Dasa is running; and if Rahu is transiting through the 6th house, then ill effects are sure to be there and critical too.

To weed off the negative aspects of this planet, there are many remedial suggestions given in the ancient astrology. One such suggestion is to consume the essence of the Blade Grass daily, about three to five tea spoonfuls, for a consecutive 48 days. This way one gets his/her blood purified and the skin ailment vanishes. This medicinal remedy is so powerful that I have seen people getting better after consuming it.

Another kind of remedy somewhat resembles pressure therapy. It is believed that if a person under Rahu's influence is made to lay on the black gram seeds for a particular no. of hours then the seeds absorb the ill effective rays from the body. Also the pressure of the seeds on the body

itself gives some massage like therapy thus one gets a maximum benefit achieved by using the Black gram.

Now for the fourth alternate suggestion given in the astrology scripts. It is widely known as a pilgrimage to the temples which cures any ailments that relate to Rahu's placement in a native's birth chart. There are 3 such temple locations for Rahu and Ketu. One is in Trimbakeshwar in Maharashtra, other at Kaalahasthi in Andhra Pradesh and the third is Thirunaageswaram in Tamilnadu. To get more details on these and the benefits one receives on a visit to any one of these places, please read my article under head "[Astrology, Myth & Facts](#)" in this site. It is self explanatory.

The third Planet people worry about is Ketu. This is also a shadow planet and it is always at 180 degrees opposite to Rahu. This planet too moves in anti clock wise direction. Ketu is the kaaraka or cause for many good and bad events in one's life.

## **MARS**

**The well known *Manglik, Kuja Dosham* or what they call as *Chevvai Dosham*.**

Mars, is identified as the Ruling planet of earth and known as Bhoomi Karaka. It is denoted with brothers, Fire, Accidents, cuts, wounds, injuries, rudeness, anger, short temper, lethal weapon and War. It is also a most feared planet in general and marriage alliance seekers in particular.

People in India are too scared about the planet Mars known as *Kuja* or *Mangal*. If this Planet is placed in the 2nd, 4th, 7th or 8th houses from one's ascendant or from the Moon sign in their horoscope/Natal Chart, then it is really difficult for them to find a suitable match and get married. It is a very foolish idea that marriages in India are delayed only on this count. I know a number of persons affected by branding them as "*manglik*" They fear that if a person is married to a non *manglik* either one of them will die soon. The fear of reduced longevity for one of the coupled makes everyone to think twice before the wed lock.

As many astrologers profess this as a major cause or set back for one's marriage, many of the match making efforts are tactically rejected showing only on this count. No doubt, the planetary influences are to the maximum extent causing some imbalances in everybody's life, it certainly cannot be taken as granted to reject an alliance only on the ground that the person is "*manglik*".

My father, Late Shri Mukkur Ramabathrachariyar, has once clearly explained to me that a number of matches can be found and suitable alliances can be arranged, if a proper study of the horoscope is undertaken. For example, majority of the people who fall under Positive Blood group are having the planet Mars in their 1-2-4-7-8 or 12th houses. However, there are exceptions given based on the placement of Mars occupying or in conjunction with some beneficial planets. If these valuable points are ignored, then really one misses his/her suitable alliance and wrongfully confined and coupled with other non matching ones.

Likewise, majority of the Non *manglik* horoscopes, which I have seen are of Negative Blood groups where Mars is placed in their Natal Chart at 3-5-6-9-10 or 11th house from Ascendant or Moon sign. Here again, many exceptions are given, someone having Mars in the 7th house can be of Positive Blood group and some one who has the Mars placed in the 3rd or 5th of their natal chart can be of Negative Blood group. But leaving the exceptions, majority of the cases are as aforesaid.

Although it is the placement of the Mars that is now being considered here, let us discuss some most vital points too. If the birth time given is wrong, then the entire horoscope is wrong and meaningless. In some cases, the Longitude & Latitude of the birth place is wrongly given, then too, the natal chart erected goes wrong. In most cases, when the birth is taking place in the hospitals, the birth timing is not so seriously taken.

I found myself in the mess, that a staff nurse in the hospital writing the timing as 2.30 PM, when my daughter was born at 1.06 pm exactly, and the doctor who attended the delivery confirmed it to me personally & immediately on delivery. I was waiting outside the ward room when it happened. And I did check and note the time. Alas, the staff nurse found her time to note the entries only at a time that was suitable to her, hence she fixed the birth time! In such cases, can one fully depend only on the horoscopes' matching? Is there any astrologer who takes the risk and blame for rejecting a perfect match, otherwise found to be *manglik*?

Also, there is a risk of classifying a person as *manglik*, if her/his birth takes place during a time, whence even the fraction of minute can change the natal chart housing positions. They are known as border cases or the junctions, when actually they may not be one!

I emphasize here, for the readers to understand that *manglik* is not any untoward. Nor should one have any fear of it. It is nothing but a classification of Blood group that can be judged by the placement of Mars in their natal chart. In simple terms, Negative goes with Negative and Positive with Positive. Whether it is electricity or human body, the rule is same. So when next time you search for an alliance, if you find the match is perfect in every respect excepting the placement of Mars, then better you go for matching the blood group rather than fully depending on the unpredictable astrology!!

I am not blaming the subject Astrology as unpredictable, predictably, most of the astrologers do it in haste, without considering the consequences. The rules, exceptions and inclusions are there to see, but just simply they stamp a person as *manglik*, if the Mars is placed in the houses of 1-2-4-7-8 & 12. This is where they fail and mismatch many horoscopes that fails in practical life.

There are two systems to calculate one's horoscope viz. Nirayana and Sayana; The Hindu and Indian system mostly follows the Nirayana System that is vastly experienced as the best suited one. Now let us study the effects of Chevvai known as Kuja or Mangal (Mars), as per the Nirayana system. The placement of Mars or Mangal known in Tamil as Kujan and its house-wise position effects are listed below. If the Lagna or Ascendant and the Moon's sign is same for a person, then it is considered that the Kuja dosham is doubled! It is most vital to see the Hindu System astrological calculations, which is considered as an effective one in finding the results. However, once should read the chart before coming to conclusion as Mangalik, thoroughly from the Moon sign & Ascendant. According to the Devakolam system now prevailing in Kerala and in some parts of Tamilnadu one should also check this Mangal's effect from the Venus (Sukran) also.

As per the Ancient Indian Astrology Kuja Dosham is considered an important aspect in marriage match making and compatibility. The very word scares and sends shivers along the spine of the alliance seekers. The moment they hear that Kuja Dosham exists in one chart, they drop it and say

you find a match with similar Dosham. Chevvai or Kuja Dosham means the placement of Mangal-Kuja (Mars) in houses 1, 2,4,7,8,12 from Lagna as well from Moon sign is bad and will cause death or separation of spouse and hence should be avoided for marriage alliance unless both the parties have the same extent of Chevvai / Kuja Dosham -Mangalik.

The second house from Lagna defined wealth, eye sight, tongue, longevity, communication and transport and the presence of Mars - Kuja in this affects the smooth sail of life in these fields and thus may cause death or separation of spouse/life partner and hence should be avoided. But there are exceptions for this, that is dealt in detail separately.

The placement of Mars/ Kuja in 4th house from Lagna, the house that deals with the subjects of family, mother, and thus Mars, a harsh and fiery planet, causes danger to those fields governed by the 4th house and hence should be avoided for marriage alliance.

If the Mars is placed in the 7th house from Lagna, the house of spouse and partners, should not have the presence of Mars - Kuja and if present may cause disputes and death of spouse. So an alliance with Mars in seventh house shall be avoided. If both are having the same proposition then sure you can consider this for a match

The 8th house is for health, longevity and death and if the Mars present here then it is a potentially a danger to the native of the chart because it is considered the native as an accident prone and hence an alliance with short life span person be avoided.

The 12th house is considered for Sayana, Moksha & Viraya (expenditure) and if Mars present in this house. it will affect the longevity of the native hence an alliance with short span of life should be avoided.

For the above reasons an alliance with a person having Mars placed in 2,4,7,8 & 12 houses of the horoscope are considered as people having Kuja Dosham or Mangalik and be avoided unless the other party is also having same value and extent of Kuja Dosham-Mangalik. Mars represents of a persons ego, self esteem, energy, will power, confidence and temperament. If mars dosham is there then it can make a native's temper volatile. Such natives have troubles adjusting with spouse, friends & colleagues can at times become ruthless.

However traditional Indian system of Hindu Astrology has given certain exemptions even if the Mars - Kuja placed in these houses with the following simple conditions.

1. If Lagna or Moon sign is Capricorn (Makaram - where Mars is exalted) OR in Cancer (where Mars is debilitated) or Leo (Simmam as the Sun, Lord of Leo's Exalting House is Aries) Aries (Mesham) or Scorpio (Viruchikam) as the last two being Mar's own house. The Kuja/Mangal dosham will not affect or apply nor will do any harm to them.
2. If Mars is in 12th house and the 12th house is Taurus or Libra then also the native will not have the applicability of Kuja Dosham. This exception is given because both Taurus and Libra are the direct 7th houses from Mar's own house.
3. Like wise Mars in 4th house and if the 4th house falls in Aries and Scorpio then Kuja Dosham does not apply.
4. If the 7th house is in Capricorn or Cancer and the Mars placed in any of them, then also Kuja Dosham does not apply.

5. If Mars is positioned in the 8th house and the 8th house falls in Sagittarius or Pisces then Kuja Dosham does not apply.
6. If Mars is in conjunction with Jupiter (Guru) or Sun (Suryan) or Sani, then the Mangalic effect is nullified.
7. A general opinion is that if Mars is in 2nd or 12th in the male horoscope or Mars in the 4th & 7th houses in female horoscope or Mars in 8th in either of the horoscope, there is no escape from Kuja Dosham. This single placement is considered too harsh to have Mangalik or Chevvai or Kuja Dosham.
8. If Jupiter's 5th, 7th or 9th house aspect is visible, then the native need not worry at all. If Mars is in conjunction with Jupiter and Moon, then it is considered more lucky as **Guru Mangala Yogam** and **Gaja Kesari Yogam** is combined together to weed off the ill effects!
9. Quite apart from the above, if Mangal or Mars is in 8th house in conjunction with Venus known as Sukra, then it is really more harmful. It is a must to find a suitable alliance only with the same combination of horoscope. Venus in the 7th house aspect of Mars from 7th or 8th house Drishti is still worse. If this happen to be the exalted house of Mars, i.e. Makara, then surely a same combination of alliance should be sought. It is just because, the physical and sexual demands will be more, or to say critically high, so the partner should match this criteria.

If a person is born on a Tuesday, then not to worry as for them, they are surely not a Mangalik, since the day lord Mars Rules for the day, the Manglik effect is nullified to a maximum extent. If Mars is in conjunction or aspect by Jupiter, Sun or Saturn, then too the ill effects are nullified. According to *Deva Kolam*, even exchange of house with Mars by any other planet causes this *Dosham* nullified. In terms of Astrology and the Indian system I have listed few vital aspects of the Kuja Dosham - **Mangalik - Chevvai dosham**. Now it is for the reader just to judge and value the the above, comparing it with Science and nature. The general and known house-wise effects of Mar's placement is listed below:

Mars dominated natives have a tremendous fire like energy and if this energy is not utilized in something constructive then the above related problem arises. This specific **Mangal Dosham** or **Chevvai Dosham** is generally affect the marital life. Ill effects of Mars/Mangal in the houses are as listed below; Let's see the house-wise effects of Mars in a native's chart:

#### **Mars in Lagna (Ascendant - 1st house):**

It will directly aspect the houses 7th house and also Its aspect (*Drushti*) is powerfully fall in the 8th house. 7th house being the house of life partner, Mars will create quarrels even on minor issues. Here it indicates physical violence and sexual abuse. Because of cruel behavior of such a native will be despised by society. Will not be able to gain assets.

#### **Mars in the 2nd house:**

The second house represents for Family, left eye sight, Money, cash flow, and tongue. If Mars is placed in the 2nd house, then the person is of curt, temperament, harsh, talkative and with rash in nature.

#### **Mars in 4th house:**

This house also represents happiness. This also affects the work area. Will frequently change profession and jobs. Will not be economically successful. No job security

.

### **Mars in 7th house:**

Here it causes great anger. The native possesses extra energy. If Mars placed equally in the 7th house of the couple, then the physical pleasure would surely make them as happiest couple. If otherwise, the person with Mars in the 7th house will never get any physical/ sexual satisfaction from the partner as it will be a mis-matched couple. Therefore it is most likely that the native has tendency to look from outside for his pleasures, thus putting a question mark on his/her character. It makes such a person with an abnormal interests such as domination, fetish, bondage. It is most likely, that he/she will have some differences with family members.

### **Mars In 8th House:**

Loss of paternal property and bad relationship with the elders of the family. A person with lethargic attitude and lazy. No help he/she will get from the co-borns. Will vise away the time and will expect the spouse to earn.

### **Mars in 12th house:**

Sudden financial losses are indicated in this house. Lot of enemies and the enemies will always trouble such a native. Will have lot of mental problems and anxiety. Lack of co-operation from brothers, or No brother at all (*Sahothra Nashtam*).

**However, the alignments of other planets, the Drushti known as aspect and the conjunctive effects of rest of the planets are more influencing factors in judgment. So, please do not conclude that the above statement alone valid; it surely depends on of other factors too, which must be considered before branding any one as manglik.**

No doubt, the ancient scholars did a splendid job by identifying many of the planetary influences on the Earth, but they never would have thought about our present day astrologers influences! Oh, how many perfect suitable marriage alliances are rejected, how many mismatched ones are coupled and how many divorces and death takes place just because of horoscope mismatched bondages!

**OH, NO MORE MISMATCHES,** please. Just check the other qualities of the prospective bride or groom, if only on the ground of *manglik* it is rejected, then better you go for Blood Group check and match it fine from there on. And this way, you can escape and be saved from the HIV infected alliances too!

I am sure, the contents given above are an eye opener to many of the alliance seekers and I write this with good intentions. Surely, I am not blaming any Astrologers or their profession, but underline the need to go for soul searching. In practical terms, I did come across as many as 300 horoscopes, that were matched by astrologers as best suited, but actually the female partner suffers more, when the blood group is a mismatch. This too, most often occurs, when they are pregnant and also post birth problems are of more serious in nature.

Father is positive - mother is of negative blood group. And if the child born with positive group, then the breast feeding is a complicated one as the child's intake might make a lots of complication right from the first time. At times, even the child may have to be kept under medical observation for a longer period than the normal times. Like wise for the negative blood group father and positive blood group mother and if the child is of negative blood group, again same sort of problem occurs.

So, be sure, you match the blood group, when you are branded as or in doubt about the *Kuja Dosham*, *Manglik* or *Chevvai Dosham*. This will certainly give you the scientific value, if you consult a medical practitioner too in this regard.

The following chart illustrate the placement of Navagraha in any Temple. While making Navratna stone set in any Ring, it is highly recommended to follow the following picture explanation and to fix the gem stones according to the guidance given in Vedic Astrology. Sun being the centrist star, the Solar celestial phenomena needs to be understood properly. A glance at the following navagraha positioning would suffice to any goldsmith to fix the stone accordingly; the following picture gives the directions of each planet viz.: Sun at the Center, Mercury in the North East, Venus in the East, Moon in the South East, Jupiter at the North, Mars at the Southern End, Dragons Tail (Ketu) at the North West, Saturn in the West and the Dragon's Head (Rahu) in the South West corner. These are the positioning of Navagraha in any of the Navagraha Mandir known as Navagraha Temple:

### The Navagraha (9 Planets) Temple Locations in Tamilnadu

Now, for the benefit of the readers, I list below the Navagraha Temples situated in Tamilnadu. Though there are many other destinations for Specific Temple, these nine temples are situated at a strategic location, from where one can take a tour to these Navagraha temples in two or three days conveniently. Stationed from Kumbakonam, Tamilnadu, one can visit the Navagraha Temples situated in and around this town. The approximate distance and time taken is indicated below. These distance quoted are of approximate and only from starting point as Kumbakonam. This town

has a moderate population and can be accessed by road or Train from Chennai & Trichi. Chennai and Trichirapally are connected by air. No five star luxury hotels available but can be accessed from Trichy. If efficiently planned, or with any experienced travel agency taking your assignment, one can take a day return trip from Kumbakonam and finish off the visits in two days time.

The [Tamilnadu Tourism Development Corpn.](#) also arranges a regular 3 nights/4 days tour visiting to all the following Navagraha Temple and also makes arrangements for online bookings/accommodation & transport etc. but this tour originates from Trichirapalli (Trichy) as base.

<b>Navagraha Lord</b>	<b>Temple location</b>	<b>Distance and Route</b>
Suryanar Koil ( <b>Temple for Sun</b> )	Suryanarkoil.	18 Kms. towards Mayiladuthurai Route (3 Kms. from Aduthurai which is on the Kumbakonam - Mayiladuthurai Road)

All the above temples can be easily accessed from Kumbakonam; The Navagraha temples, which are famous for each Planet, that are situated around Mayiladuthurai. One can visit all the 9 temples in a day, starting from Mayuram and it has become quite a popular tourist circuit today. People having Ragu dosha come here during Rahu (Raghu) kalam and perform Abishekas. Pancha Kaala Pooja (Five times a day worship) are being done daily basis. Special Abhishekas are performed between 4.30 to 6 p.m. (Raghu Kalam) on all Sundays. As far the transport, there are government bus service and train services are available. It is best advised to take a train service from Chennai or Trichy, because it is economical and a quick mode to reach Kumbakonam. More so, the roads are not even and the journey makes one feel sick! Hotel accommodations are available in and around Kumbakonam and the Hoteliers too arrange for transportation on an arranged manner, if a request is made in advance.

**Horoscope Chart - Where it begin - A specimen sketch:**

The following chart shows the divisions and allocations in degrees for each division; The first column that beginning with "0" Degree is known as Aries and the proceed with 30 degrees for each sign in Clockwise position. The Hindu Astrology name for each sign given in Blue and degree allocations marked in Red. Now you can check your birth chart known as Horoscope or Jathakam (Jadakam - Jadagam) and your Rasi known as Moon Sign is where the Moon or Chandran is placed. In each house or division of 30 degrees, the western name of the sign, Hindu Astrology based Sanskrit name, house number and the total degree it holds are given one by one in each line. The second chart shows the representing the Nakshatram for each sign. The third chart just simply the Navamsa sign of each house or rasi.

Now within the Each 30 degrees, a sub division of 13 degree 20 minutes counted as one constellation known as Nakshatram or Star. Thus each 30 degree consist of 2 full and a quarter star (Nakshatra) that equals to 108 quarters of all the 27 stars ( 27 x 4 quarter).

The above two chart give you a clear picture as to star-wise as well as Degree-wise placement of constellations in each house. These twelve houses are known as Rasi.

Whether it is north Indian style or South Indian style of horoscope chart, normally both carry two chart namely Lagna Rasi Chakram (Lagna Kundali) and Navamsa Chakram (Navamsa Kundali). Though the system and divisions in both style are the same, the only difference being South Indian Horoscope Chart shown in Clock-wise movements, wherein North Indian Horoscope charts are shown in Anti Clock-wise.

Meenam	Mesham	Rishabam	Mithunam	
Kumbam	NAVAMSA CHAKRAM			Katakam
Makaram				Simmam
Dhanusu	Virichikam	Thulam	Kanni	

**Though the Navamsa Kundali known as Navamsa chakram is similar to the main horoscope chart, the planetary alignments are positioned according to the placement of planets in the original main chart. This is called as 9 divisions of nakshatra rasi to make Navamsa Kundali.**

The above chart shows 01 as Ascendant. But practically, whichever the sign is falling into ascendant that will be placed at the top (in place of 01 - here the 01 or the Ascendant is not necessarily "Aries" but can be any other Lagna). Then it is counted from there on, in anti-clock wise till the 12th sign. Most important to note here is, that whichever the Lagna a person is born under, placed on the top.

Now for the houses and the moon sign along with Ruler of the houses, the following chart is given in detail for a simple study. One can easily recognize the zodiac signs and its influence with each body part and plus and minus points of its actual placement at the time of birth. In the Natal chart erected for a person, the planetary alignments are to be taken into account, while giving any judgment for the same. However, the Running Dasa Bukti, and its sub, sub-sub divisions are to be considered; also, the transition of any planet at a given time is to be considered for predictions. The following Rasi Chakram Chart illustrate the simple notations on the same.
